OVERVIEW

Global Health in Social Work and the Social Sciences- Dominican Republic, is a 3 credit hour short-term study abroad program that runs in the Spring semester, providing students an opportunity to study health and community care services in the Dominican Republic. The program combines on-line learning modules with nine days of education abroad in the San Pedro de Marcois area of the Dominican Republic. In-country, students have lectures from the Universidad Central del Este Medical School and participate in hospital, clinic, and community services visits. Students will enjoy cultural day trips to Santo Domingo and a local beach, to open and close their time in-country.

TIME ABROAD

Spring 2019 travel dates will take place over the MSU Spring break, from Saturday, March 2 through Sunday, March 11, 2019.

FOCUS ON SOCIAL AND BEHAVIORAL HEALTH

Developed by the School of Social Work and the Institute for Global Health, the curriculum considers ‘health’ as a multidimensional construct and uses learning goals based on interdisciplinary competencies. The program will emphasize the social and behavioral aspects of health by exploring examples from research, interventions, and local approaches that support community health. Responsible cross-national and cross-cultural engagement will also be addressed. Students interested in global health and international mental health topics are encouraged to apply! The program is open to all interested MSU students who meet program eligibility.

More details about this program can be found at...
